

From 18 June to 2 July I was able to live a wonderful experience. I am so thankful that I got to go to Ireland. I have to say that I've also been really lucky, as Ireland was my first choice, I always wanted to visit it and in fact, as I imagined, it was really worth it. Since I arrived I had a great time, everybody was very sociable and kind, we spent the first hours waiting for the others at the airport talking, it was beautiful. Thinking about how we met rips me a tear.

We did it all, drama class, 46 km cycling (which i will never forget), art & crafts workshop prints and driftwood, we traveled by bus to other cities, we did gardening , visited a university and tried Irish sports, we went to the luna park, we visited Viking museums, we went swimming etc ...

Every evening a nation was chosen and the people of that nation had to cook dinner for everyone: it was a lot of fun, both in terms of the act of cooking itself, and for the good luck of being able to taste specialties from all over the world. Also after dinner, everybody's presentations were scheduled for countries. One of the things i enjoyed the most.

Before leaving home I had no expectations: I couldn't imagine how this new experience, certainly fantastic, could be. But I never expected it would be so great that I wanted to stay there. I found a new family, special people, with whom I spent 15 of the best days of my life. I will never forget each of my mates in adventures and life, all of them have a place in my heart. Even those in charge, those who have endured and supported us, golden people.

Indissoluble bonds were born, it was as if the perfect people had arrived at the perfect time. I hope I will have the opportunity to repeat such an experience, it was memorable. The best thing was to feel useful, because we served there too, from gardening in a home of people with trauma to cleaning the parks. It is always nice to be of help to the community.

I will certainly travel again in my life, but I will never forget Ireland 2022.
